SKILLS

- **Digital health implementation**, HIS product ownership, and UHC systems strengthening
- **Interoperability**: HL7 FHIR, eReferral workflows, SMART Guidelines/DAK, SDC, terminology concepts
- **Health data governance**, data standards, data quality review, and reporting workflows
- Monitoring, evaluation, learning, implementation research, and evidence-use facilitation
- **Data Analysis**: Robust analytical abilities with a knack for collecting, organizing, and disseminating complex data sets with precision and accuracy.
- **Statistical Software Proficiency**: Proficient in handling large datasets using advanced statistical tools such as R, SPSS and Python.
- **Data Visualization**: Skilled in using data visualization software including Tableau, Power BI, and Flourish Studio, for compelling presentation of data insights.
- **Data Storytelling**: Expertise in translating complex data into compelling, easy-to-understand narratives that drive decision-making.
- **Technical Proficiency**: High proficiency in Microsoft Office Suite, with specialized skills in VBA programming for Excel and Google Appscript for Google Spreadsheet.
- **Collaborative Research**: Proven success in collaborating with various academic bodies for data analysis and presentation, promoting data-informed decision-making.
- **Communication**: Excellent written and verbal communication skills, facilitating clear and concise data interpretation and reporting.
- **Work Ethic**: Adherence to a high standard of personal work ethics, guaranteeing professionalism and dedication in all tasks undertaken.

EDUCATION

BS Statistics

Mindanao State University – Iligan Institute of Technology (2012-2016)

PUBLICATION

"Optimal vaccination control for COVID-19 in a metapopulation model: a case of the Philippines"

<https://doi.org/10.3389/fams.2023.1154634>

DASHBOARD

Chikiting Ligtas 2023 Reporting: [\[bit.ly/socotchikiting\]](https://bit.ly/socotchikiting)

Provincial Mortality Reporting: bit.ly/socotmortality

Provincial Morbidity Reporting: bit.ly/socotmorbidity

Provincial Oral Healthcare Reporting: bit.ly/fhfsisdentalsocot

Provincial COVID-19 Dashboard: bit.ly/covid19sox

ABOUT ME

A dedicated statistician and educator with strong organizational and leadership abilities.

A goal-oriented, highly motivated individual who recently completed several databases with dashboards for efficient and quick transactions. Highly efficient with an excellent eye for detail, a quick learner who can quickly absorb new information, and a communicator who can communicate clearly and effectively.

EXPERIENCE

Independent Consultant - Data Analytics Coach

Australia Awards (DFAT), DevConsult Inc., Ronan Analytics | Apr 2025-June 2025

- Coach government agency teams on Strategic Knowledge Management and Data Analytics for public-sector Re-Entry Action Plan (REAP) design and implementation.
- Deliver face-to-face sessions, online masterclasses, coaching clinics, and asynchronous learning support; prepare session materials and practical analytics guidance.
- Support participants in translating data analytics concepts into agency-level action plans, adoption strategies, and presentation outputs for DFAT/Australia Awards stakeholders.

Project Evaluation Officer II

Integrated Provincial Health Office of South Cotabato (September 2022 – Present)

- Lead development and implementation support for the South Cotabato One Health Information System (SCOHIS), strengthening UHC reporting, patient-level service tracking, and local evidence-use.
- Serve as Health Information System Support Cluster lead; coordinate digital health, FHSIS modernization, dashboarding, analytics, and interoperability-related work with provincial and municipal stakeholders.
- Develop and maintain dashboards and automated reporting workflows for mortality, morbidity, immunization, oral health, and program performance monitoring using KoboToolbox, Looker Studio, Tableau, R, Python, VBA, and Apps Script.
- Contribute to PeReF/eReferral FHIR implementation work, including referral workflow analysis, minimum data requirements, SMART Guidelines/DAK alignment, and connectathon-readiness discussions.
- Co-author research and support implementation research, UHC technical work, policy presentations, and provincial systems strengthening initiatives.

Statistician I

Integrated Provincial Health Office of South Cotabato (Mar 2019 – September 2022)

- Managed and modernized provincial FHSIS data workflows, including an Excel VBA-based eFHSIS data management system that reduced consolidation time from weeks to minutes.
- Built COVID-19 and public health dashboards and analytics products used by local decision-makers for surveillance, planning, and response.
- Provided statistical analysis, data management, visualization, and technical assistance to health staff, LGUs, academic partners, and NGO collaborators.

Science Research Specialist / Special Science Teacher I

Philippine Science High School – SOCCSKSARGEN Region Campus (Jul 2016 – Mar 2019)

- Developed Excel/VBA- and Python-supported tools for teacher evaluation, grading sheets, clinic admission records, and institutional reporting.
- Taught statistics and supported student and institutional research through data collection, analysis, and reporting.
